MEMORANDUM FOR THE RECORD

SUBJECT: Quality Control of PF-1 Fuel

1. Responsibility for loading non-contaminated fuel into storage tanks is delegated to the USAF through AFIGO-S.
2. Responsibility for non-contamination of fuel from storage tanks to include filling of tanker aircraft is vested with Agency personnel.
3. Responsibility for security of aircraft plumbing circuit breakers, pumps and allied aircraft parts is the responsibility of the aircraft commander.
4. Responsibility for sampling of fuel during flushing procedures, after loading is completed and after mission has been flown is the responsibility of Agency POL personnel.
5. It is further agreed in the interest of safety that prior to all operational refueling missions an additional sample of the fuel will be taken by Agency POL personnel approximately two and one-half hours prior to each planned A-12 or KC-135 takeoff, whichever is earlier.
6. The above items were agreed to by SAC and Agency personnel during meeting held at Agency Headquarters on 14 November 1963.
